*Axelay could be the
hottest shooter ever made!*

Electronic Gaming Monthly

They said it all! Other shooter games may claim they're the best. But Axelay reveals its true colors on the high speed, Super NES™ ride of your life through untold eons of spectrum shattering special 3-D effects.

Scream through the stratosphere horizontally or tear up the extraterrestrials in head-on vertical style. You're flying the prototype tactical fighter ship, Axelay, with the most sophisticated weaponry ever invented, like the deadly Round Vulcan with its full 360° range.

In 6 shocking stages of horrific floating fortresses, multi-legged mobile forts, robot cities, volcanoes and the City of Darkness you may be tempted to stop and see the sights. Not a good idea, even for a glance, unless you want an asteroid up your nose. Just see for yourself what the critics are raving about.

*Gauge every fire power
and attack pattern or
you'll be cosmic dust.*

*Axelay's arsenal is prepped
and primed for confronting
the huge retreating hordes
at the end of each stage.*

INSERT COIN

THE BIGGEST AND BEST JUST GOT BETTER...

What you now hold in your hands is the largest video game magazine ever produced in America! Weighing in at 320 pages (sure, I know 48 of them comprise Electronic Boutique's new catalog, but they're cool too), this mega-gaming monstrosity is packed to the rim with all of the explosive color, hot news and secret info only EGM can deliver.

I know I speak for the rest of the EGM staff when I tell you that we've had an absolutely awesome time working to deliver the best video game mag around. As the size and scope of the magazine (not to mention the industry that it serves) change, you can count on us to be there with the first look at whatever the latest games, tips, or technology may be!

Although the video game industry has been able to mature at a zippy rate, all of this expansion has caused a nasty topic to rear its ugly head for the first time. The illegal copying of games is a problem that has been relegated to computer software in the past, but now threatens to take hold of the video game scene.

Using special devices that enable gaming pirates to download programming code, a few small bands of unscrupulous gamers have started duplicating favorite games for mass consumption within their clicks. Although the extent of the disease is small, largely because of the high cost and unavailability of the illegal hardware needed to copy, it does exist and is against the law.

Electronic Gaming Monthly recognizes the hard work and large investments that video game developers and manufacturers continue to make to bring us the hottest new games that cut the leading edge of technology. By illegally copying any video game, potential pirates hurt the hobby by decreasing overall sales. Even if the game is an older title, the integrity of the product remains the same and should not, under any circumstances, be violated.

Recently Electronic Gaming Monthly has instituted a company policy that mandates an end to illegal video game duplication. We are working with a number of major video game licensees to isolate the perpetrators of illegal game copying in an effort to bring about an end to this new form of crime. If you are aware of any such activities, or if you know the names of companies offering illegal video game duplication equipment, please contact me personally at Sendai Publishing Group, 1920 Highland Avenue, Suite 222, Lombard, Illinois, 60148, attention: Game Pirates.

Getting back to the magazine, I hope you get into this issue of EGM as much as we did when we were making it! The holiday season is shaping up to be a blast and I'm glad that you've tuned to the Biggest and Best Video Game Magazine for all your gaming needs. And don't forget to hold onto this special collector's issue - after all it's the biggest mag the states have ever seen!

At least until next month!

Did you ever dream of having your name printed across the pages of a magazine for more than 100,000 video game players to see? If so, then go write to a different gaming mag! If you're also scoring nearly 1,000,000 points at eyes, however, then scan us a line at Interface, Letters to the Editor, c/o Simtek Publishing Group, 1400 Highland Avenue, Suite 202, Lombard, Illinois 60148. We'll pass through your praise and fit it just enough for the *Pringo* Mag web page! Remember, we're not responsible for the fire clubs and missile raids that will bombard your inbox due to your near-bound fame, but we'll be glad to sell you additional copies for the loved ones, the Young Ones, or just to sock on your wallet for just \$4.99. What a deal!

SEGA CD UPDATE!

I am very interested in purchasing the Sega CD as soon as it comes out this fall. I believe that CD games are the wave of the future and Sega seems to have the most up-to-date game system and CD technology. Even though I have researched my purchase, there still seem to be a few unknowns in the way the Sega CD will be packaged. I get all the game magazines and nobody seems to know exactly what us game players will get for our \$299. One magazine which used to have reliable info is saying Sol-Face won't be released in the U.S. while Sega says that it will be one of the discs included with the system! The mag also says that *Renovation* will do Cobra Command but Sega again says that they will bring out the disc. Sega should know what they are doing but can you give us the final story on the mysterious Sega CD.

Vincent Tucker
Raleigh, NC

Sol-Face is now one of the pack-in discs included with the Sega CD.

(Ed. Always willing to help Vince. The reason why you are getting different stories is because Sega is constantly changing their minds. The CD system is very important to them and they want to give the players the best deal possible when the system comes out this holiday season.

With the system configuration literally changing every month, you have to be careful which magazine you get the information from. Not to bash our competition, but EGM has the shortest lead-time in the biz!

Anyway, Sega currently plans to include Sherlock Holmes Consulting Detective, Sol-Face, a four in one Sega Classics disc that contains Streets of Rage, Columns, Golden Axe and Revenge of Shinobi (Super Monaco GP will not be on this disc), a CD+G demo disc and a CD audio disc. Is this the final configuration? Does Sonic the Hedgehog have a bad attitude?

There have been other game changes happening on the Sega systems. Cobra Command CD, previously known as Thunderstorm FX, is now being brought out by Sega themselves, not Renovation. The U.S. rights to the hot cart Thunder Force 4 have also gone to Sega, who are planning to call it Lightning Strike. Ditto for Ex-Mutants, being developed by Malibu Interactive. One thing is for sure - if you want to get the latest information keep tuned to EGM!

BOGUS SF2 ARCADE GAMES

I recently took a trip to Taiwan. I know most of the Japanese imports go immediately over there, and of course, SF2 was the hottest arcade around. One thing that was unusual though was that the SF2 machines are different. My friends living there said that these "different" versions were illegal ripoffs. While they look and play very much like SF2 they could do new moves. Not only that but you could perform moves in the air! The fireballs could be thrown so slow that you could walk inside your own fireball! Sonic booms could be thrown in mid air. There were many more new and interesting twists to the game.

While I understand that these versions will never appear in the U.S., Capcom should consider doing something similar. Playing SF2 CD every day gets pretty boring and these changes add all new strategy!

Hubert Cheng
La Jolla CA

When I went down to the pizza parlor to play SF2 CE, I discovered there were new mid-air moves! The game was fun but can EGM tell me if this was a rip-off game?

Steve Rossa
Millbrae, CA

(Both machines were rips, guys. Although they may be way-cool, it's not a great idea to support your local gray-board importer. Try Mortal Kombat instead.

WONDERMEGA BLUES...

Now with the Sega CD only a month away I am getting very excited about this spectacular peripheral. While \$299 is a bit on the high side, the free discs do make it a good value for the money.

That was until I saw your last issue and off in the corner on one your EGM Express pages is a picture of something called the Wondermega. Just exactly what is this? Should I consider buying this new product, or will it even come out in the U.S.?

Michael Robles
Bronx, NY

JVC's Wondermega will be coming to the U.S. later this year.

(Ed. You must have missed our May issue Micheal. We broke the news to the nation about this nifty product. In essence, the Wondermega is a Genesis and a Sega CD wrapped in one. As far as graphics and video are concerned, other than a built-in Super VHS video output, there isn't any difference. If you are really into the audio, however, then you will want to at least take a look at this system. JVC has added a few cool features that will turn your crank. A special bass enhancer which adds punch to the lower frequencies and a digital audio processor which expands the dynamic range of the music are the two most important additions. Believe me, if you run your games through a stereo system (not just the TV) you will definitely want the Wondermega! Other features include a mike input, a karaoke echo and a MIDI (Musical Instrument Digital Interface) port.

If you thought that the Sega CD was expensive, Michael, you better sit down for this one. The Wondermega lists for over \$620 in Japan.

Since its introduction, however, the price has decreased to about \$400. There are two versions of the system in Japan. One is released by Sega and the other sports the JVC label. Other than decals and pack-in software, the systems are the same.

Here in the U.S., Sega hasn't indicated whether they will bring out their version of the Wondermega. JVC, on the other hand, is currently thinking of bringing their system out later this year.)

PLAY STATION DEAD?

I am an avid Super NES and Sony fan, and the Play Station looked to be a dream come true. That was quite a while ago and other than bits

OK, so it really isn't a true psycho letter, but there was someone willing to go to the trouble of hunting up a relative named Dhalsim as we requested in the Tricks of the Trade section.

Mr. Eric McGovern of Port Orange, Florida is the crazy who made his sister up as Street Fighter 2's gummy warrior. C'mon Eric, it was a joke! You score the free loot, bud, but don't think you have us fooled for a moment!

"Sir,
Enclosed is my sister's birth record and picture. She is 8 years old and her name is Dhalsim! I am 8 and I think it's a funny name. Please send my games. I have a Super NES."

and pieces of new info, there hasn't been anything new about Sony's dream machine. Have they soothed their problems with Nintendo? Will the Super NES CD-ROM and the Play Station still be competitive?

Cedar Mulligan
Port Alexander, AK

(Ed. We haven't heard anything new about the Play Station for a few months. It's important to note that Sony has signed up with Sega to be a CD-ROM software licensee. This being the case, the best guess is that they were never able to reach an agreement with Nintendo and probably decided to hold off on bringing out their own system since they didn't have the software support.)

MORE MORTAL KOMBAT!

That's enough Street Fighter 2 coverage! You now have to cover Midway's hot new fighting game - Mortal Kombat. Do just what you did with the SF game and cover all the moves! Also, Make it a point to show the fatalities!

Giami Barlett
North Miami, FL

I have been going to the local arcade for the past month and all I have been playing is the game Mortal Kombat. At least, when I can get to it. The line is so long I can only get a couple of games in each night. By the way, the SF2 CE game isn't even being played now that Mortal Kombat is in! My problem is that I am getting my tail locked because I don't know the special moves. How about telling me a few of these moves so I can last longer than 2 minutes.

Dave Hanna
Hanover Park, IL

Thanks for the story on Mortal Kombat. I've been playing it for three months now and I've gotten so good that I can beat the game with Scorpion. Do you know when they are coming out with a Mortal Kombat 2?

P.S. Here are some of the special moves. Hope you like them!
Scorpion's Death Wish - Hold block button down and press up, up, and get 3 feet away.
Raiden's Death Wish - F, F, B, B, B, High Punch.
Sonya's Death Wish - F, F, B, B, Block Button.

(Ed. We have already received over a hundred letters on this hot new arcade fighter! Watch future issues of EGM for more info, pix and all the special moves. The way it looks from our end, SF2 CE seems to be dropping in popularity rapidly. It is taking some time for the MK machines to get out across the country, but as soon as the players see MK they're hooked! With SF3 eons away it looks like MK is the new king!)

A self-proclaimed retro-rockstar, Steve prefers the 60's-70's era. While he won't pass up the latest Clapton, the Stones, Zeppelin and Floyd remain his favorites.

The Stones? Is that a new instrument? The head-ad may be short on current events, but the up-tempo rock of the Beach Boys usually fits the bill.

Following the theme of the blockbuster movie, Super Star Wars is translated with great attention to detail throughout. Embracing conventional side-scrolling action themes while adding Mode 7 Lend-speeder and flying sequences, the play technique is straightforward but very solid. Well drawn cinema displays motivate the storyline and help bring additional depth to the characters as you advance the movie's well-known plot. Fight off Luke's home world, meet up with Han Solo and Chewbecca, and blast to the Death Star to rescue Princess Leia. Return to take on Darth Vader and blow the space station away!

S Although this game has a few problems with its control and navigation, the package is presented in a first-class manner. The graphics are absolutely incredible and complimented with strong play action and good technique. The game is simplistic in design, but the quality of the design is second to none! A winner!

M This is a dream come true for Star Wars fans. The game is all you could want. You can't help getting hooked. The graphics are great, the music is absolutely phenomenal and the game play is fast and action-packed from beginning to end. This is the best movie-to-game translation that I've ever seen! Encore please. E.S. Bill

Easily one of the best games of the year! Everything that is required of a great game is there - graphics, sound and game play. While it isn't an easy game, and some players find it frustrating, the difficulty level is just hard enough so that you can't just breeze through the game in a few minutes.

Super Star Wars is destined to become a Super NES classic for the next year. With the graphically intense backdrops, interstellar soundscapes, and a proven storyline, what else could you expect? This grandfather of epics is making the video game transformation exceptionally well! Do we thank the Force?

The latest blaster for the Nintendo 16-Bit includes five levels of intergalactic conflict. Combining detailed graphics, standard video game play mechanics and some innovative techniques come together to add credibility to this shooter. Fight through ten levels of play, using the Garland fighter's powerful cannons and special ability to lock-on to enemy craft to steal-away their weapon enhancements.

While the real focus of this game is the unique capture-and-power-up technique, the game flies higher on its graphics than its play. Its a solid, if somewhat sparse, battle, and selection of weaponry is interesting, but the overall graphic representation of the background and foreground characters is where the soft shines.

A better than average shooter from Atlas. The graphics are pretty well done and the game play is well controllable. It isn't a very easy game but not so hard as to make it frustrating while it isn't revolutionary, it does offer satisfactory entertainment for the shooter fans. The sound is good enough to listen to for a few times.

Why would a company release a mediocre shooter, when other carts show how good a SNES shooter can really be? The game is fairly decent, but the graphics are nothing to shout about. The sound department isn't the best either. The game play is very straightforward with only a few cool options. Missed it by...

Hoorey! Another shooter to keep the dust off my game shelf. Too late, too late is often becoming the byline of most shooters this year, however, and Blazeon is no exception. It's passable in most departments, but it still isn't enough. To really blow your socks off, you need strength and charisma, not just good looks.

The latest in Spectrum Holobyte's line of Tetrtris spin-offs, Wordtris succeeds in combining the addictive play of the original tris game with an educational angle that teaches as it plays.

Boasting a 50,000 word dictionary to recognize even the most obscure language, each level of Wordtris encourages players to better their vocabulary in an effort to stop the rising stack of letters.

Although I love Tetris, I haven't found any of the follow-up titles to have anywhere near the same level of appeal. This game isn't much different, complicating the addictive qualities of Tetris with unnecessary demands on how items are placed. On its own Wordtris would be average, compared to Tetris it falls way short.

Wow, another puzzle game on the SNES! I like the concept of being able to actually think in a game, but the system seems to be under-thought. The vocabulary is exceptional and that must be where all the mention was gone to. A fun way to expand a player's vocabulary! Give it a try!

Come on now! I liked Tetris, but isn't this taking it a bit too far? While the game play is similar, but it just isn't the same. The backgrounds are interesting and the playing concept is different than 90% of the SNES carts out there. A change of pace that will stimulate your mind as well as your reflexes.

While Wordtris really puts your mind to work, it quickly becomes clear that this is a lot of power for a Game Boy-type game. Still, for those of us who like to challenge our minds as well as our reflexes, Wordtris will be useful. One problem: it may be a pretty smart game, but it doesn't recognize all the words it should.

Expanding on the number of sports games available for the Super NES, Amazing Tennis attempts to recreate the game and provide a wide variety of options to any would-be Agassi's!

Game play is presented in a nicely sculpted three-quarter angle that provides plenty of mobility and a nice look. Three different court types are available, with solo or head-to-head contests available.

I'm not a big fan of video tennis, but this game is appealing, especially in the head-to-head mode (while most sports game excel). As a solo mode, however, Amazing Tennis is still an attractive game that features decent graphics and good sound support. If tennis is your game, there isn't much here that should offend you.

Unlike many of the other sports, there isn't a whole lot to play in a game of tennis. The actions are rather predictable and easy to learn. The graphics are very well done and the control is very responsive though it will take some practice to really get good. Of all the tennis games out there, this is easily one of the best.

First of all, I don't get into playing enhanced ping-pong. This is a very good tennis cart and is very close to the real sport. The graphics are well done and the animation is great. It gives a while to get used to the game play, but overall it responds well. A decent effort that should please most sports enthusiasts.

Amazing Tennis is not exactly my favorite game to hack at. When it's hard to learn play control, most will toss the game through the window in frustration long before they learn even the basics. True, after weeks of practice you may begin to win a couple of games, but only the patient will triumph.

A truly unique approach to the usual brand of action games, Spindizzy Worlds offers a combination of straight action play with an innovative control and environment filled with obstacles to overcome.

As a space-age top, the player must successfully wind through various three-dimensional mazes. Don't bump into anything or fall, however, or the spinning icon will break! Conquer all 30 levels!

I like the approach of this game a lot, even if it does get a bit frustrating at times. The unique nature of the action, combined with decent graphics and some fun techniques make up for any of the soft's minor shortcomings. For a change of pace that provides a leisurely challenge, Spindizzy may be for you.

Spindizzy is a great game. The controls will take a while to get used to but once learned, this is the type of game that becomes very addictive and hard to put down. The game concept is unique and the puzzles are a real mind benders. Although the graphics are unspectacular the game play more than makes up for it.

Once in a while I play a game that is totally original. Spindizzy has a unique style of game play that reminds me of Marble Madness. The game is filled with puzzles and plenty of tricky situations. The graphics could be a little more interesting and the sounds aren't too impressive, but it does stay fresh for the first ten rounds.

While the graphics and sound hint of Marble Madness, Spindizzy Worlds is much, much more. This game requires you to utilize your problem-solving skills in order to finish a round. The object isn't just to plow past obstacles but to think your way around them. Spindizzy Worlds is a great puzzle-race-against-time game!

This game continues the story that has been made popular in the successful Final Fantasy series - sort of. Final Fantasy - Mystic Quest takes many of the play mechanics found in earlier Final Fantasy efforts and places them within a slightly less challenging environment.

Four gems have been stolen by a tyrant and must be recovered to save the earth. The light tone of the quest should make it fun for kids.

This RPG is actually quite fun to play and runs at a consistently fast pace. It never dwells heavily on any one aspect of the adventure and features just enough depth in the story and action to make for an enjoyable time. While the game is geared toward a younger set, its ease is the only fault I could find.

A perfect RPG for the player who doesn't want to have to spend hundreds of hours in solving the game. The beginner will enjoy the challenge and even the experienced questmaster will find the game challenging. The graphics are noteworthy as they are better than the average screens we are used to in other RPG's.

Another RPG from the folks at Square! The game is set up as a typical RPG with plenty of mazes, pointless battle scenes, and hours of searching for much needed items. The music is by far the most impressive aspect of the cart and the graphics are the notch too. The quest is good but geared for the younger crowd.

Final Fantasy MQ is a great amateur's adventure title with some of the quests to solve FF MQ isn't very hard, but it's solid, so it should be popular with that crowd. Let's face it, FF MQ is a HQ RPG, not quite suited 4 WII, but since it will go MIA PDQ at your local EB, KB, etc., U had better RSVP yours ASAP!

Super Mario makes his latest appearance on the Super NES atop a super-charged go-kart! This driving variant expands upon the F-Zero three-quarter play style with more tracks, different characters and power-ups that can be used to knock opposing racers off the course! Great graphics and music support the action and add even more to the Super Mario Bros. theme.

This is the best driving game to come along for some time. Mario Kart may look like an F-Zero clone on the surface, but there are many interesting upgrades ranging from power-ups to special combat modes using a split-screen layout. Replay options and plenty of tracks add to the appeal of this super game!

Another hit for Nintendo. They may not make many games in a year but the ones they do are spectacular. Cute looking but not a cakewalk as this is a game that requires lots of practice to master. Fun for the kids but challenging enough for those who take their racing seriously. A definite must have!

A cute, but very good follow-up to F-Zero. This game may look easy, but don't be fooled! It really isn't. The game play is very good and loaded with neat features like nitro's rebuy. The graphics and music are top quality and utilize Mode 7 very well. The game is a ton of fun and even better in two-player mode.

Jammin'! Super Mario Kart really blasts past the fun barrier, bringing all of my favorite Nintendo characters back in one spectacular racing game with plenty of power-ups, race tracks and obstacles! This is one of those games that is very hard to put down, especially with the twin screen action and replays!

The classic cartoon character is back for an adventure on the NES. An evil professor has kidnapped the beloved Kitty, and is holding her hostage in exchange for Felix's coveted magic bag. The game is filled with various dangers and traps around every corner. There are helpful items to collect and bonus rooms where you can power-up! Use over 10 different magical power-ups to save Kitty.

The variety afforded by the magical bag of tricks gives this game some character, but what you're left with through a predominant amount of play is a standard side-scroller with some nice graphics and technique. The action never gets too heavy and the musical overtones, while missing the mark occasionally, are fun.

With great games like this one the old 8-Bit Nintendo could last another year. Easily one of the most creative NES games to come out this year, it's definitely worth buying. Felix plays well and has lots of different items to collect, great animation and a long adventure will keep the whole family busy for quite some time.

This just may well be one of the last 8-Bit games really worth playing. The theme is killer and brings back one of the coolest cartoon characters around. Tons of special items keep the game interesting. Cute graphics and OK sounds combined with solid game play make this cart a winner. Grab your magic bag and save Kitty!

Surprisingly, the 8-bit king still has a little life left in it, thanks to games like Felix the Cat. The graphics and sounds are cute, but I want to see this in 16-bit. If the programmers can translate this theme and story into the 16-bit world, it's sure to be a hit. As it stands on 8-bit, however, Felix is still a bag of fun!

There's a new planet on the universal map and a rivalry has started between the neighborhood deities. You must pick one of four different gods and set up a race of people on the planet. Your race of people will advance in civilization and weapons technology as time passes. The object is to build better weapons and stronger fortresses so you can crush the other races and claim the planet as your sole prize.

This game is a combination of several proven concepts that really well for me. Although the game never reaches a burning crescendo, the steady pace of the game, coupled with very good graphics and sound support, make it worth investigating. The plot is involving and delivers on its promises.

Definitely not the type of game for the player who wants instant gratification. Tyrants is a game that requires thinking and progress is slow. If you ever liked to control peoples destiny, this is the one for you. Kind of like a cross between Populous and the Star series. Not bad but not for everybody.

No offense, but this game bores me. The game play is too similar in concept to Populous. The graphics are nothing special and the music is average for the Genesis. Once I got through the first couple levels, the game got extremely repetitive and I became uninterested very quickly. Not my cup of tea.

Games like Tyrants are generally best left to computer gamers with the patience for such slow, repetitive game play. By adding more action to these titles, it could be entertaining. While the concept is fine, as well as detailed graphics, the game itself moves too slowly with not enough surprises for high interest.

Joe Montana is back for his third attempt at grid iron action the Genesis. This cart features official NFL teams and play-by-play digitized announcers. The game has plenty of new features and a zoom-in effect that brings you into the action. Play through a full season as the computer keeps track of the American and National league and sets up the big Super Bowl game. Realistic football action is the goal of this sequel.

While the Madden series have always been my favorite football games, Sega is making some strides in the right direction with this soft. The gloss is heaped on in the second sequel, with many new features being joined by official NFL licenses. The play control still comes up short, however, although it's an improvement!

It looks like Sega has finally created a spectacular football game. If anything the voice is worth the price of admission. The announcer really can hear and his voice is superb. No garbled speech here and his vocabulary is quite extensive. More importantly the game plays outstanding and a good change of pace from Madden.

This is the best football game that Sega has brought out yet, but it still can't compare with Madden. The new additions to the game play and the improved voice are very cool. The zoom-in view of the action is a great effect and the game play has really improved since the last cart. A good appetizer to hold you over till Madden '93!

The best thing about Sports Talk Football is that you KNOW Madden '93 will be that much better! Sorry Sega, but as impressive as ST FB is, it needs more clarity and control to stand up to the rock solid feel of the Madden titles. With a few adjustments these two series of football games will be neck and neck!

LHX Attack Copter

Action

Now

45

8 Meg

Get behind the controls of the one of the most powerful attack helicopters in the world. This cart is a flight simulation and action packed shooter all in one. Choose from an Apache or the top secret LHX helicopter and take to the skies. Realistic polygon graphics depict the action from five different views. Equip your copter with state-of-the-art weaponry and go on a courageous mission for your country.

LHX suffers from the same ailments that plague carts that try to reproduce arcade-quality polygon graphics. The overall environment is sparsely drawn, the action is painfully slow even in the heat of battle and the goals repetitive. It does deserve credit for being the best poly game so far - but it still left me unimpressed.

A good copter simulation but game play is hampered by the not quite perfect polygon graphics. Notice lot of background detail but with enemy targets to shoot at you won't spend much time looking around at the scenery. Good control of the copter and the missions get harder as you get better. Good but not great.

Surprisingly, the Genesis really handles the polygon graphics in this game well. The game play is a little shaky, but there is plenty of control and the helicopter is easy to fly. There are lots of targets to destroy and the missions get rather difficult as you progress. It's a good thing you can blow up the camels or I'd get bored.

LHX Attack Copter is pretty stable for a polygon flying simulation. The graphics break up a little around the edges sometimes, but overall it's a good shooter with plenty to target. Even the challenge is fairly consistent. It's looking steadily right up to the final stages. Look for possible sequels to this one with cleaner graphics.

An evil armada of cyborgs are trying to take over the world and Air Zonk is the only one who can stop them. Zonk had a spell of amnesia for a while, but faithful gamers across the land helped him remember his name. The game play is loaded with 8 power-ups and 10 special options. There are 5 stages of nonstop scrolling action and huge cartoon-like bosses waiting at the end of each challenging level.

While this game tries to buy some faith on the Bank franchise, it really doesn't need to. Nor should it. This game is totally original and a worthwhile investment. Using some of the dandiest graphics to show up on the Turbo in some time, Zonk delivers a fast-paced blast, with a title character oozing with personality. Good job!

Zonk, Bank, whatever. TTI has taken the old cove man and made him for the 90's. They did a good job, especially by not relying on the old character to carry the game. The Zonk has a personality of his own and this is probably the best way to break away from the Bank series. One of the best Turbo games!

A great addition to the Turbo library! This shooter has a unique theme and really shines. Graphics are well animated and very colorful, with end bosses that are huge! The game play is filled with power-ups and loads of enemies supported by music that is totally cool! Zonk is a fun shooter with more than enough challenge.

What can I say? Air Zonk is really hard-hitting fun with colorful colors and sounds! The enemies are just as entertaining as the main character himself, and wait until you see the last Boss! Wow! The TurboGrab-It is really beginning to make a turn-around. I can't wait for more Zonk titles in the future!

This disc will be one of the pack in games on the 3-in-1 disc with the Turbo Duo or will be available for the regular Turbo CD with the new system card. The game is an explosive side scrolling shooter with 7 levels of intense action and huge end-of-level bosses. There are three main power-ups and they can be powered up threefold. The game features a CD musical score and loads of cinematic displays at the intro and ending.

Gate of Thunder marks a milestone for the Turbo! This is the first disc game that is all-out fun from start to finish. Despite a lack of difficulty, the action, graphics and music of this title are top-notch all the way! The game has been deftly orchestrated and gives shooter fans new reason to look into the Turbo CD.

Talk about intense action! This shooter holds its own when compared to the best action carts on any system. Tons of enemies, huge bosses and excellent graphics. Fantastic music! While challenging it could have been harder, but only the best of players will slow through this shooter in a short time.

Gate of Thunder is without a doubt, one of the best shooters that we played in a long time. The graphics are phenomenal, every end Boss is huge and is awesomely detailed, incredible music and tons of cool cinematics also enhance the disc. The best thing is the near-perfect game play. It's only vice is the ease of its play.

Now this is a shooter to watch for! It really has what it takes to become all of the flash and fire of a top-down arcade machine! Superb graphics, a highlight every scene with high quality cinematic colors, and great sound. This Bosses up the ante with intense cinematic sequences guaranteed to please!

May The Force Go With You.

The Death Star threatens to crush the rebellion forever. Darth Vader holds Princess Leia captive. Only you Luke Skywalker, leader of the last band of rebels for good, can stop them. With Han Solo and Obi Wan Kenobi on your side and the Millennium Falcon as your ride, you have the Force to win. Better take off now.

With cool Luke! This Sand Creature throws space age fire balls

Like many clichés in society these Lemmings don't have a mind of their own and are brainless when it comes to danger. You must be the one to lead them safely through 30 levels of dangers and lemming traps. Choose which lemmings should do the job that will save the rest. Sometimes one of these little dudes will have to be heroic and give up his life to save the others. It's kind of gats you all choked up.

I've had enough of these little guys already! All I have to say for their Game Gear appearance is a good job. You've managed to duplicate a puzzle game that I've never really had a fondness for almost perfectly. 30 levels and toned down visuals didn't undo my earlier opinions of the game. Not for me!

Sega did a good job in making sure that the little rodents would be visible on the small portable screen especially when they were ahead of the console versions. Nothing new here but if you like to take your puzzles with you this is probably one of the best to have come out for the game gear in a long time.

Lemmings are everywhere! The Game Gear does a good job of bringing this sadistic puzzler to the portable frontier. The game play is exactly the same and very little has been lost in the translation. There aren't as many levels as other versions and the lemmings are very tiny on the screen. Above average time passer.

Is there a wrong way to cook a Lemming? This lovely recipe is just what the doctor ordered for long family time (just don't forget the car adapter!) Of course, there's nothing cute about consuming an entire race of Lemmings in their death, but saving them is a challenge worth 'gearin' up for.

A creepy clan of Neandertal nerds has kidnapped all of your cave babes. Joe and Mac are the two bravest cavemen in your tribe and have set out to rescue the much missed demsels in distress. There are prehistoric dangers everywhere you go. Hungry Tyrannosaurs and pesky Pterodactyls are on the prowl. Collect primitive weaponry and fight your way through 5 levels of marvelous metazoic mayhem.

I liked this game a lot! The detail in the graphics, both the character animations and background scenery is first-class all the way. The action is transferred from earlier versions with a high attention to quality. The game is difficult to play whenever the action does swing rapidly, but it still doesn't overshadow a great game.

It isn't often when a GameBoy cart plays, looks, and sounds better than its Nintendo cousin but this is one of them. The game play is great and the character is easy to control. The graphics are unusually well done and if it wasn't for the GameBoy hardware problems this would have been a near perfect game.

Believe it or not, the GB version is better than the NES version. The graphics are very detailed and the animation is good. The Bosses are huge and actually look decent on the tiny GB screen. The game play is also very good and moves along very smoothly. Look a heedeche this BIG from the constant blurring though.

Cute game, cute graphics, cute sounds, and a quiet system. Oh wait, three out of four isn't too bad. The constant blurring (typical) really destroys what should be considered excellent graphics and detail! The game itself is masterful considering the limitations, but no game should have to beg for glasses this way.

It's time to hit the grid iron and it's also time to hit the NFL. Don't worry! Now you can bring NFL action with you wherever you go. You can choose from the AFC or NFC teams and picks your plays from an extensive clipboard filled with defensive end offensive plays and formations. The fluid scales in and out depending on where the action is going down. Go for the touchdown in this realistic football cart.

I was not impressed with this game at all. The concept of a simple video football game has been cluttered with a lack of focus and poor implementation of what could have been cool effects (like the isolation scaling). The control is poor and brings down the whole game. An NFL license does not a game make.

I had high hopes for this cart but it fell far short of being spectacular. Player control is difficult, partly because of the small screen and partly because of the poor animation. It is choppy when it moves and this doesn't help either. I liked the NFL teams but I would have rather had a better playing game with no name teams.

This is a decent football game for a portable system, but I really think that it could've been done much better on a system like the Lynx. The game play is decent, but the scaling has a slight chopiness. The sounds are equally annoying. The use of real NFL teams is a plus, but doesn't salvage this mediocre cart.

Ouch! What should have been a seven or an eight barely scores a field goal! The choppy graphics really make this intense game hard to follow if the graphics can be smoothed out and the animations refined, we might see a really jammin' sequel on the horizon. Until then, I'll wait for baseball season.

FOOTBALL'S GREATEST LINE-UP EVER.

Get ready to tackle Madden's finest season yet John Madden Football™ '93. The all-new version of the game with the greatest run anywhere. The top of the charts since day one.

This year, Madden really makes history. Twenty-eight updated pro teams. The eight greatest teams of all time—

Miami '72, Oakland '76, Dallas '77, Pittsburgh '78, Washington '82, San Francisco '84, Chicago '85, New York '86.

Plus the '92 All-Madden team and his Greatest Ever squad.

So you can pit the Hogs against the Steel Curtain. And see who lands on top. In all, thirty-eight different teams. Think you can find a more hard-hitting game? Take a hike.

8 GREATEST TEAMS

MIAMI '72
OAKLAND '76
DALLAS '77
PITTSBURGH '78
WASHINGTON '82
SAN FRANCISCO '84
CHICAGO '85
NEW YORK '86
Here are my picks.

John

Talk about a game with Madden written all over it. Madden '93 has yards of plays. A total of 125 including new audibles. Each from the pen of John Madden. Including the no-huddle offense and a quarter-back kills the clock play.

It's a game of match-ups—Madden's brand of football. Each team scouted by the man himself. Better back-up saves game and player stats through the playoffs. Make the right match-up at every position and you'll go all the way.

The actions never been more explosive. Shoestring catches. Clothesline tackles. Head butts. Defensive shifts. Safety blitzes. Taunts.

The more intense the action, the more excited Madden gets. Blasting out comments like "Boom!"

Madden's playbook has some big surprises. Get caught! in the wrong formation and you'll get burned!

Where'd that truck come from? It's the true personality of football.

Call the no-huddle offense and you'll give an out-of-position defense the slip. Especially if it's a snowy day in Buffalo.

With head butts and shoestring catches, this game definitely has all the right moves.

A split play-calling screen keeps the other side of the line on its toes. Tougher computer opponents keep you on your toes. **CIRCLE #111 ON READER SERVICE CARD.**

GAMING GOSSIP

...Nintendo Announces 32-Bit CD-ROM...New RISC-chips for the Super NES...Jaguar Developer Targeted...
...SMSG Designers Named...Sega Expands Game Design Network...Tandy Gets Into Games and Machines...

...Step right up to the new fat-free Quartermann column that gives you all the great taste you expect from a gossip column without any of the calories! The Q-Mann has scoped out some great gaming goodies for you this month, kiddies, including both news on all of the new consoles for you hardware heads out there! Without further delay, let's open this Oreo wide open...Hold your breath if you want to turn blue, but not if you expect to be playing CD games on your Super NES any time soon. The big 'N' has nixed their plans to belly up against Sega's impending machine, privately indicating that they don't see CD games being that different from regular carts. While this isn't a bad call in the Quartermann's eyes, Nintendo is keeping their hands wet with development of a 32-Bit CD-ROM complete with a slick custom chip set that they say could be ready by August of '93. Sega gets its head start again, but with the enhancements Nintendo is promising in their CD design, we might see the mighty mega-power of gaming quickly taking over Sonic's home turf - but only if the unit proves to be more than smoke...

...Replacing Nintendo's next super system is a super chip! The terminators of Nintendo have developed proprietary code that enables the Super NES to display higher quality 3-D softs without the need for a hardware extension! The Super FX chip gives the Nintendo 16-Bitter the power to deliver shaded polygon images through RISC-based technology. Expect the first title to use the innovative ROMs to hit in February, with a slew of third-party products to follow...The Q-Mann's been sporting wood over the new DSP chip that enhances the processing speed of the Super NES. But now I hear that the games that utilize the zippy Seta chips could cost over 100 bucks! Timberrrr...

...Yours truly has finally zeroed in on the developer of the super secret Atari Jaguar project! As the Q-Mann pegged previously, the system is being designed in Europe by a company contracted by the Tramiel Trio. The 64-Bit (yeah, right) miracle machine supposedly uses RISC-based technology to produce shaded polygon images like those found in arcade drivers like Virtual Racing (deja vu)! The hardware house responsible for Atari's last gasp is called Flare. Look for a debut around the Summer '93 CES where Atari hopes to have 20 titles ready to go! 20 games with no development staff? No way Hans, no way...While we're on the subject of game development, Sega plans to open a midwest R&D house under the command of industry veteran Joe Robbins who's late of Sunsoft. The group is looking to produce two carts and one CD project every year for the Genesis and could begin on Virtual Racing as their first multi-media project! Don't understand why you picked our neck of the woods, but welcome to the neighborhood...

...Now on to the machine that no one but Quartermann wants to talk about. The EA/Warner/Matsushita team is readying a test of their play-by-cable system, the SMSG, for early next year somewhere in the north-east according to recent rumors. A consumer version, with CD capability may also be made available later in the year. What all you Quarter-maniacs may not be aware of, however, is that the design team that put together the latest in video game technology is comprised of almost all the same members that also gave birth to the Lynx hand-held and Amiga computer...What's the only thing worse than having the 'exclusive' to a game that EGM covered months earlier? Putting a hologram on your cover that's the same size as the editor's... News from the Japanese front points to new and improved Genesis games just around the corner! The buzz on the street says that the Genesis will soon be able to display more colors, choose from more colors and enjoy enhanced resolution through a number of nifty software tricks! The Q-Mann will keep you posted...

...Look for Tandy (the buds from Radio Shack) to promo their CD-I driver soon with an Inspector Gadget game. How many chips will be created before the white shirts wrap-up and develop a uniform CD platform that all-carts can use?...Don't trust a game mag editor named after his underwear...Well, we knew that Data would find his head, but I've got my fingers crossed that Q makes an intro sometime soon!...Till next time, stay fluffy...

SUPER-FX CHIP BRINGS 3-D TO SUPER NES

During the prestigious Shoshinakai Software Show (basically a Nintendo-only trade show) in Tokyo, Nintendo of Japan president Hiroshi Yamauchi confirmed reports that Electronic Gaming Monthly had been making for several months. On August 26, 1992, the top dog of Nintendo unveiled plans to use a new chip set, called Super FX, in future 16-Bit Super NES game cartridges.

The proprietary chip used by the FX extender is based on RISC technology and includes a digital signal processor. The chip has been designed to perform high level mathematical functions enabling the Super NES to now display textured mapping, shading and real-time three-dimensional effects. The quality of the new visuals is reportedly so good, according to Nintendo, that

Is this the future of video games?
Nintendo and Atari think so.

they claim their 16-Bitner will be able to out perform anything currently on the market.

The first set of softs to utilize the new Super FX chip will be released by Nintendo in February, 1993. No title was given, but it is known that third-party licensees won't get their hands on the technology until early next year.

The Super FX chip is not the first DSP upgrade available for the Super NES. Game licensee and developer Sets has introduced a new extender that enhances the speed of the console to nearly 8MHz! The first game that will take advantage of the innovation in a big way will be F1-ROC 2 which should find its way onto store shelves sometime in the middle of next year.

The Sets-designed Digital Signal Processor chip speeds up the SNES!

The Nintendo chip will allow the Super NES to really take on Atari's Jaguar system, which is also based on RISC technology (although insiders who have seen both hint that the Atari hardware still surpasses Nintendo's software upgrade). The first real casualty of the Super FX chip was instead Nintendo's own CD-ROM drive (see related story).

Super Mario Kart is but one of several 16-Bit games to use add-on chips.

SUPER NES 32-BIT CD COMING NEXT YEAR

Coinciding with the announcement during the Shoshinakai Software Show in Tokyo, Nintendo announced that they are shelving plans to have a CD-ROM drive on the market any time soon.

Earlier conceptual drawings of the Super NES CD-ROM now seem wrong.

Instead of competing directly with Sega, Nintendo now hopes to battle out the next generation of gaming on their own terms, sometime in late 1993.

To gain the overwhelming advances that Nintendo feels CD-ROM needs for success, they are continuing with the development of such an accessory but will instead base it on a new, custom 32-Bit processor.

Nintendo of Japan president Hiroshi Yamauchi indicated that a 32-Bit Super NES CD-ROM peripheral could be in production by August of 1993. Further plans will be announced at the '93 SCES.

GENESIS AND NES GET MODEM GAMING

One of the first peripherals originally unveiled for the Sega 16-Bitter was the Tele-Genesis modem. This "revolutionary" device was touted as the next generation of video games at a time when NEC was countering the Genesis with their own CD-ROM add-on for the TurboGrafx-16. Ultimately, the Turbo upgrade failed to meet with widespread acceptance and the Sega modem, once it became evident that the threat from NEC was hollow, never saw the light of day in the states.

That fact hasn't deterred a new upstart from seeking to plot its own growth in the telephone gaming market.

The Teleplay Interactive System, being released in the Spring of 1993 by Baton Technologies, promises to deliver on the promises Sega made over three years ago! Their unit goes beyond the wizardry of the original Sega device, however, to also include NES games, a faster baud rate and a number of game releases that take advantage of the unit.

Sega's Tele-Genesis modem promised play over the phone lines but ultimately fizzled. Although a Sega modem network was started in Japan, it never gained acceptance.

While info on the new network was sketchy at press time, the basic elements of the add-on have been revealed to EGM.

The modem operates as a stand-alone attachment that connects to the Genesis via the expansion port. A separate lead going out of the

Teleplay System then runs to an operating telephone jack. You dial another Baton modem owner, follow the on-screen prompts, and play away!

While the company has privately indicated that they intend to have a Nintendo version of the system available soon, and that cross-platform play (with Genesis and NES owners competing at the same time) may be possible, no working details were divulged. Although such a feat may be possible, it would seem likely that the quality of the games would mirror the technological restrictions of the NES, rather than the options afforded by the Genesis, if head-to-head play were possible.

The system runs at 2400 baud, another indicating factor that the quality of modem play may be limited for the same reasons that eventually sent the Tele-Genesis to its grave. The first game, *Terran Wars*, is far from complex, but still remains a competitive two-player title.

Supposedly the device will also make additional upgrades, such as computer keyboards, accessible to Genesis modem users. In any event, modem gaming appears to have arrived.

The Baton Teleplay Interactive System will bring modem play to console users for the first time! Although not expected to be available until Spring, the system is shaping up!

VIRTUAL RACING

With all the hype surrounding virtual reality, it is refreshing to see a company take full advantage of what the technology has to offer.

Sega has created a racing masterpiece in Virtual Racing, which uses incredibly fluid polygon graphics and an air bladder system to give you the sensation of motion.

You can select between four different viewing perspectives including behind-the-car, top view, aerial view and cockpit view. The lifelike racing sensations are extremely impressive and exciting!

• HOW IT RATES •

With the use of everything from air bladders to simulate motion to a steering wheel that features a tension mechanism for added realism, Sega succeeds in creating one of the most realistic racing games ever.

The polygon graphics are smooth and mobile. The selection of views as well as transmission types enhances the already fantastic game play. The machine even has link-up capabilities which will allow multi-player racing!

Virtual Racing leaves all other racing games eating its technological dust!

THE GAME DOCTOR

Riddles Unravelled The Doc Delivers the Cure

You know, yours truly has been serving as The Game Doctor since 1981, and in that time I've worked on some pretty popular magazines. But never—I repeat—have I seen such an incredible outpouring of patients before coming here to EGM. Wow. I really appreciate the business!

Okay, enough with the intros, let's get this show on the road.

Q: I recently found a picture in a magazine of Red M. Bison vs. The Blue Chun Li on Zangief stage in *Street Fighter II* Underneath, it said from the streets of Super Nintendo. Now I really want to know if there is a code to make *SF II* into the Champion Edition. Of course, right after I saw that picture, I started to make calls. I hesitated to call Capcom because last time I called they told me there were no codes at all for *Street Fighter II*. I was really mad when I found out about the player vs player code.

So if you can, Game Doctor, find a code to make it Champion Edition, and if there isn't a code clear up all the rumors that are going around. Thanks, Doc.

Mike Beidel
Wausaw, WI

A: Well, I'm sure you've already read in EGM about the "secret code" available in *Street Fighter II*. But first, let's discuss the differences between *Street Fighter II* and the Champion Edition. In the Champion Edition two things are now possible: players can operate Bosses and two players can both choose the same fighter. There is a code which allows the existing Super NES version of *Street Fighter II* to access the mode in which both gamers can use the same fighter, but so far as the Doc knows, no code has been uncovered which allows players to become Bosses. EGM will be the first to show you if one pops up.

LETTER • OF • THE • MONTH

Q: I think the new Lynx looks cool! I was wondering if there is any way I could trade my old model Lynx for the new one? I hope you can help me out with this one, Doc.

David Smith
Alvord, TX

A: According to the folks at Atari Customer Service, (408-744-0800) you can send them your old Lynx along with \$55 and Atari will mail you a new model Lynx with a full warranty. Write to: Atari Service Center, 390 Caribbean Dr., Sunnyvale, CA 94089.

A quick reminder: anyone promised a Game Doc Prize Packet who doesn't receive it within two weeks of publication, drop me a POSTCARD (not a letter) addressed to: Game Doctor Prize Packet (MIA). Because of the massive influx of your letters and other information my office, sometimes these packages get misplaced.

Q: How is it possible that CD players can run video games?

Jamie Passey
Bellingham, WA

A: CDs in the gaming world can be used in several ways. We traditionally think of them as possessing great audio and often supplying actual human speech for printed text, but when it comes to high frame-rate arcade-style games, CDs can have problems.

Playing video games, however, is something CDs can do as easily as cartridges, floppy discs or any other memory storage medium. The CD-ROM systems generally dump all the code into a buffer, which can then run the game without any search and display problems. A CD, after all, can hold up to 550 megabytes, so memory space and great sound are its strong points. The only problem occurs when a system's buffer isn't big enough to hold an entire game in resident memory. In fact, the major problem with the original TurboGrafx-16's CD drive was that it didn't have enough buffer space to hold an average-sized game. TT's new version basically increased the buffer space to bring it up to standard.

Good question, Jamie!

Will the Master Gear Converter Always Work?

Q: Last night I mail ordered a Master Gear converter for my Game Gear. Early this afternoon, however, I was reading a back issue of a magazine that reviewed the device at length.

The review said that there were two games that reportedly had problems with the display hardware inside the Game Gear: **Phantasy Star** (I was heart-broken!) and **Lord of the Sword**. What are these problems? Is the text just blurred, or is it like old Atari 2600 flashbacks?

Buck Rogers
Abilene, TX

P.S.: Buck Rogers is not my real name.

A: Well, Buck, or whoever you are, the problem is that the Game Gear was never really intended to run programs higher than 4 Megs and it does have problems with those games. The games in question, however, are not unplayable. A pixel or two might get scrambled or blink out then reappear, but it's nothing to make you give up on a favorite game. Otherwise, the play seems to hold up just fine.

P.S.: The Game Doctor isn't my real name, either.

Q: First of all, let me say that I've enjoyed reading EGM and your column in the past and for the most part found your answers to be accurate. Being a former Atari Corp. employee, however, I felt it necessary to point out an error printed in your October '92 column. In response to a letter from Ed Rogers, you stated that Atari Games markets the Lynx while Atari Corp. is the coin-op company. This is incorrect. Atari Corp., which is located in Sunnyvale, CA, is responsible for the Lynx (Epyx being the original developer) and Atari Games in Milpitas, CA, develops the arcade machines.

Gary Barth
Third Party Licensing
Sega of America

A: Thank you, Gary. Did you ever have a mental block about something, and it's so strong, the more you have it wrong, the greater the certainty that you are correct? My apologies for the misdiagnosis.

Q&A QUICKIES: For those folks who insist a Super NES can't be hooked up to a VGA monitor, I still say it should be possible. Try contacting the world famous Redmond Cable of Redmond, WA. These guys make adapters for everything. If it's only a matter of the pin connection, don't sweat it, they'll probably have something for you—if not now, then next week. But as I believe I said once before—generating sound is going to be another big problem, since VGA monitors have no internal speakers...so why do all these folks want to hook up their Super NES systems to VGA monitors anyway? How about a T.V.?

By the way, because of the tremendous overflow of EGM letters, some of them may appear in our sister publication, **Electronic Games**, so make sure you check it out. Similarly, some computer-related **EG** or **EGM** questions may wind up in **CGR**, and so on. So check all three magazines—heck, buy all three—you won't find better coverage of the plugged-in gaming scene than you will from this too!

The Doc likes to share his good Qs—besides, there's nothing I hate more than not being able to answer a great question because I don't have the space!

So, before I bid you all a fond farewell and head for the swimming pool with the Game Nurse, remember to send those questions, comments, corrections and such to:

The origins of Game Codes - when was the first one discovered?

Q: Are the codes used to change the various video games deliberately placed into games by the programmers or is it by trial and error that these codes are found?

Scott Brennenstahl
Cherry Valley, CA

A: Yes, and sometimes, yes. First, let's get our terminology straight.

The very first programming trick was planted by a shrewd programmer in the Atari 2600 game called **Adventure**. Atari, which at that time did not believe in crediting game creators (and they say there's no such thing as karma!), was not pleased when they discovered it. But then the positive letters started pouring in and magazines started hunts for these little goodies hidden amidst the zillions of lines of

code. Even Atari realized it had a pretty good thing going. Tricks and codes have become a video game tradition ever since.

Sometimes, however, they get there by accident and are discovered by young gamers willing to sit for hours, trying every possible variation in order to uncover something special.

Happy hunting!

INTERNATIONAL NEWS

By Terry Aki

Hello gamers! It's Terry Aki, back once again with the best of the best in international gaming! It has been a busy month for 'ol Mr. Aki, with two big-time major game shows in Tokyo this month! I even had to let EGM head ed. Somrad sleep over during his visit! Let me tell you, when this guy cuts wood he blows sound barriers! Yikes!

Anyway, on to games and the annual Nintendo Show held August 26th and 27th in Tokyo. As you can see from the following pages, Japanese developers have plenty on the plate as we head into the new year. Dozens of new games got their public premiere at the show and from what I saw many of them look great!

INTERNATIONAL NEWS

tions of the landmark kick-fest, a couple titles showed promise. The Super CD and 12-Meg Ranma 1/2 suits showed promise as well as the Mega Drive and Super Famicom versions of Fatal Fury. If your fighting game has to have a number at the end of the title, scope out Fist of the North Star 6. It's a wild slug-a-thon with more than a few innovative touches. Although rumors that Street Fighter 3 is under development as a four-player simultaneous cart persist, no hard news has hit the streets in Japan.

The four-player Super NES adaptor from Hudson retails under \$20 in Japan.

FOUR'S COMPANY...

Several companies are setting out to juice up the Super Famicom in Japan with cool peripherals designed to offer new options. From Hudson we saw a new four-player adaptor that allows the whole gang to play. Besides the four ports opened up by the device (due to appear in November), another player can still use the open slot on the control deck. Although it wasn't on display, you can bet that a four-player Bomberman isn't far behind. Konami showed off a new controller that uses a satellite dish to pick up infra-red from their new multi-task pad. Although Konami has no firm plans to pop into the U.S. controller market, the idea should surface from another company.

Time travel is at the core of this new CD game. In Time Gal, you must stop a ruthless dictator who is using time travel to alter Earth's history and become its ruler!

An evil leader has developed the capacity to travel through time and plans to use his knowledge to take over the world. A woman has found his machine, however, and plans to use it to stop the dictator.

Time Gal is played in a fashion similar to Dragon's Lair. All the action is displayed on cinematic screens that are intense! The motion is fluid for the CD medium and opens up a new "interaction" category that other games are sure to follow.

Journey through the time zones to reach the dictator and put a stop to his dastardly plan!

Welcome to the past, a place where everything is not as it appears!

Watch your step! Quick reflexes are needed to move across this bridge.

Anything is possible in Time Gal, including a trip on a mining cart!

The evil dictator is determined to make the world his playground.

Take It To The Streets...

CRASH 'N' THE BOYS™ STREET CHALLENGE

"Crash" Cooney and his posse from Southside High own every sports record in Spring Hill history. Legends? Heroes? Not in this town—where Todd Thornley and all the rich snobs up on the Hill think Southsiders are low-lives.

So Todd and the silver-spoon mama's boys at the three "Hillier" schools have issued a desperate challenge to save their fading reps: Let's take it to the streets in the Southside...no rules...no refs...no penalties—and we'll see who comes out in one piece.

And just in case the Hillers can't handle Crash 'N' The Boys, Todd's rich daddy has fielded Team Thornley—a ringer group of super-athletes from Thornley Industries.

Five radical events. Five motivated teams. Five members per team. Only one winner.

Southside's Crash Cooney gets another 480W hat-in-the-sun record. Crash and the Southside Boys—Cheese, Nuts, Dragon and Ring-A-Ring—put the Hillers to shame.

Todd Thornley targets to hit go and takes a shot in Hammer These Golf. No Washington High team has been embarrassed by Crash once before. This time it's personal!

"Spreck" Spreckles, Jefferson High's captain shows his total moves in the Water Slaughter. He thinks Lincoln and Washington are almost as good as Southside. Almost.

Are the Hill Stoyles worth your rooftop in lowering rooftop in the Skyline Strangle. Lincoln High's team captain despises the Southsiders—especially Crash.

Rocky Rockwell makes use of the chaste/bring super Aoki in the Aoki event! The elite, computer-controlled Team Thornley is out to crush Hillers and Southsiders alike.

TERRY AKI BEATS THE STREETS...

The good word from the trenches of Tokyo were the long lines of players hoping to get their hands on Super Mario Kart. This super soft has flown off shelves like lightning, with no end in sight. Stores won't even take deposits on this hot little item and no wonder - it's a great game with loads of technical

Another super soft in short supply right now is Toho's Super Aleste. Soon to be Space Mega-Force in the states, this all-blasters-out shooter has scored a direct hit in Japan!

Things aren't so rosy, however, for the Sega Mega Drive. Our 16-bit contender has dropped in price on the street as has interest in the machine. Coupled with the poor reception the Mega CD has received (although new titles have perked interest slightly), the current rumor has Sega rushing to finish their 32-bit wonder system, the Giga Drive, for sale at the end of '93. Although the Sega president confirmed that such a device was in development, my friend Quatermann has told me that Sega is privately reluctant to intro a new system when their major focus stateside will be the Sega CD. With Nintendo bowing out of the CD sweepstakes, Sega's push for CD gaming is likely to be hard

Is 32-bit gaming around the corner? Sega may offer games like this soon!

INTERNATIONAL NEWS

Terry Aki has learned that Phantasy Star 4 will NOT be a follow-up to the third installment. Instead, Sega will take us back in time to the generations immediately following the second game! Part four will remain within the same setting, although the scope of the game will be much larger, encompassing dozens of lands instead of the handful that were traversed on the 8-Bit. Look for a lot of loose ends in the series to be tied up with this game, which should weigh in at 12 to 16 Megs!

Technosoft's brilliant Sega shooter, Thunder Force 4 (which is a sequel to part three) will be making its way to the Genesis courtesy of Sega! The game will be renamed Lightning Strike.

The "RAV" boys are back in the all-new SUPER DOUBLE DRAGON™ for your Super Nintendo Entertainment System. Really Popular Games

Two of the hottest and most eagerly awaited carts in many Tokyo moons just happen to be RPGs! Both *Dragon Quest 5* (the first 16-Bit entry in the obscenely successful series) and *Final Fantasy 5* have kept deposits high in anticipation of their respective September and December release dates. Those of you who follow EGM will realize what a milestone *Dragon Quest's* release really is: The game was nearly finished when the soft was re-worked to eliminate similarities to early efforts. The "new" *Dragon Quest* should sizzle on the Super Famicom!

Final Fight-CD has kept Japan guessing...combo play or solo once again?

Big rumors also surround the unveiling of *Final Fight CD*, due December for the Mega CD. Although everyone's hoping for an accurate arcade translation, complete with dual play, Capcom won't confirm. In fact, although the Japanese gaming press thought (as EGM did) that Capcom was an official licensee of Sega's in Japan, word from the top floor at Capcom says otherwise. If it were possible for the entire world to be wrong, then it's probably not surprising that Capcom claims to be licensing their games to Sega. If this is indeed the truth, would Capcom allow their prize possession, *Street Fighter 2*, to appear on the Sega 16-Bitter? Tune in next month!

THE JOY OF SPECS...

No longer content with the color and resolution specifications of their 16-Bit hardware, Sega is rumored to be feverishly working on two new software upgrades that will let future games pack an even greater punch!

Techs in Tokyo have perfected a way to not only increase the number of available colors that Mega Drive programmers can choose from, they're also very close to enabling the machine to display more colors as well. No word on how significant the leap in color will be, but don't look for games that use enhanced color any time soon.

Sonic 2 is the first game to use Sega's resolution compression!

During the two-player split-screen, Sonic 2 activates this new feature!

Increased resolution, on the other hand, is a feat that the Sega 16-Bit system has already mastered! A new software technique employed in Sonic 2 will allow future Mega Drive/Genesis games to actually alter the resolution of the display screen! The split-screen levels of Sonic are the first to make use of the advancement.

With the Christmas shopping season rapidly approaching, the game companies are working at a feverish pace to crank out the latest and greatest hits. Once again this section will highlight many of the new titles that have been added to the list.

KONAMI

SUNSET RIDERS

GENESIS

UKN. MEG

CARTRIDGE

The rock slide can make short work of the enemies, as well as your posse!

When Konami announced they were producing Genesis games it wasn't surprising that Sunset Riders was selected as one of their premiere titles!

In a time when cowboys and Indians were the West, men who had the power would take over towns, harass townspeople and force them to obey their every wish. They manipulated towns for their own evil purposes.

They were wrong...

Four men pledged their lives to stop these men before the Great West became a war zone. These men were Steve, Bob, Billy, and Cormano. Together, they are the Sunset Riders.

This new two player simultaneous adventure faithfully captures its arcade counterpart. The levels are identical to the coin-op in every way!

In each mission you must search for a specific bad guy from a Wanted poster. If you and your comrades capture the criminals, great rewards will be yours.

Take a ride on a rickety railroad that leads to exciting new adventures.

Don't let this guy's charm fool you. He starts shooting once he gets inside.

These boys never stop! The rooftop snipers are your greatest threat.

Shoot down this Boss and his gang in the windows to finish the round.

EVOLUTION...To paraphrase Darwin, it's the survival of the hippest. One wrong move and you're dino-meat, one wrong step and you're a fossil, one fashion faux-pas and you're the laughing stock of the gene pool, baby. Discover tools, survive and multiply or these HUMANS are a time-line footnote. In this world of chaos and carnivores...

...Keep the tribe alive.

DRAGON'S LAIR

SUPER NES UKN. MEG CARTRIDGE

Loosely based on the one-time laser disc hit, Dragon's Lair pits Dirk the Daring against the evil Wizard Mordroc!

Princess Daphne is being held prisoner in Mordroc's trap-ridden castle. To rescue her, Dirk must face Singe, the dragon that is holding her in its lower chambers.

Instead of the linear laser disc game play, Dragon's Lair now plays like an action game. No more simple joystick movements while the story takes care of itself! You are in full control of Dirk.

The levels hold secrets that only the bravest adventurers will find. To succeed, Dirk must find the hearts and crystals needed to keep his body in top condition.

This shadow beast can completely disappear, making it a tough target!

The great graphics and animation are apparent when you fight this snake.

Collect the colorful health crystals to maintain top physical condition.

TERMINATOR 2™: THE ARCADE GAME

GENESIS

UKN. MEG

CARTRIDGE

Straight from the arcade coin-op and into your living room, Terminator 2. The Arcade Game puts the thrill and suspense of the hit movie into one exciting cart!

You have the option of using the standard Genesis joypad or the Menacer peripheral to relive the exact feel of the arcade version.

The game play is very unique! Backgrounds slowly scroll while you shoot at the advancing Terminators and HK's. Power-ups are located in crates at the bottom of the screen and can be easily activated just like in the arcade!

The T-1000 awaits your arrival in the final stages of this near perfect translation.

When the Terminators get this close, expect to take some heavy damage!

When attacking the base, you must also shoot approaching missiles.

Not Recommended For Cowards.

From deep within Mordroc's Castle, a foul stench rises up to mix with the cold, damp midnight air. In the deadly caves far below the surface, the evil wizard's pet fire-breathing dragon, Singe, guards the captive Princess Daphne. You, Dirk the Daring, walk steadily toward the castle gate. You feel no fear—but then, fear is for cowards. No other would dare to enter this perilous castle where Mordroc has imprisoned the helpless princess. But for you, there is no other possible course to take. Now is the time for heroes. Now is the time to enter the

SEGA™

SEGA OF AMERICA, INC.
Consumer Products Division

Dear Sega Gamers and Friends,

It has been a remarkable year at Sega. Widespread market acceptance of 16 bit video gaming last Christmas made Sega Genesis the number one system in the \$4 billion dollar video game industry. Of course, Sonic likes to take all the credit for moving Sega into a 63% market share position but the rest of us at Sega know that it has been the strength of the entire Genesis software library and the throngs of Sega game players who have positioned us into the premier position.

But like Sega, we haven't been resting on Genesis' 16 bit leadership or Game Gear's portable category success. We've been busy creating even more technologically advanced and exciting Genesis games which showcase the awesome capabilities of our 16 bit system. We've been collecting the finest licensing properties such as Batman Returns, Evander Holyfield and Home Alone for both Genesis and Game Gear, NFL Sportstalk Football '93 with Joe Montana for Genesis and Wimbledon Tennis for Game Gear. We've also been building exceptional peripherals which will greatly enhance gameplay including Menacer with its Acu-Sight technology for dead-on shooting performance. And certainly we've been hustling to bring the most exciting advancement to video gaming... the Sega CD which transforms Genesis into a powerful, interactive CD-ROM machine. You will not believe the exciting new types of game play Sega CD provides.

In other words, Sega's been super busy doing what we do best -- bringing you advanced technology for the best in gameplay.

In 1992, Sega wants to welcome you to the next level. Are you up to it?

Biggest news is the much-awaited sequel Sonic The Hedgehog 2 coming to retail shelves around the world on "Sonic 2day" November 24. Sonic is predicting that 5 million video gaming enthusiasts worldwide will buy his latest adventures. Of course, Dr. Robotnik and his Death Egg creation are out to foil Sonic and his new friend, Tails.

Sega CD will share the limelight this Fall because of its extraordinary gameplay. Real voices, real video, real drama making Sega CD an experience you've never had at home. I encourage you to check out Night Trap, Make Your Own Music Video or Thunderstorm to see how Sega's multimedia interactivity is the next level of enjoyment.

And then there's the games. More than 350 for Genesis and 75 for Game Gear. Streets of Rage 2, Mickey Mouse and Donald Duck in World of Illusion, Dolphin, Home Alone, Chosen: The Forever Man, X-Men, Arlyon Senna's Super Monaco GP II, Shinobi II, Greendog and many, many more incredible action, shooters, rpgs and sports games.

It's an exciting time at Sega. I encourage you to catch some of it this Fall. You'll love the next level from Sega.

Sincerely,

Thomas J. Kalinowski

Into the 21st Century

Sega Force is back!

Welcome to Sega Force. It is time once again to look back at the exciting products released for the Genesis and Game Gear in the last year. This is also your chance to look forward at the exciting games of 1993. The Genesis is now bringing forward their fourth generation of game, and if you thought games like Sonic the Hedgehog were hot, you'd better hang on. With the introduction of the Sega CD, 1993 promises to be the best year yet!

So if you think you can handle all of the ultra-hot information we have waiting for you, read on. Sega Force has landed!

Genesis — Three years and still going strong.

Another year has passed us by, and Genesis is still the number one system, for super-charged 16-Bit gaming! Over three million more systems have been sold in the last year, meaning the public has spoken and the Genesis is here to stay!

Companies who, in the past, exclusively made games for the other guy, have wised up. Soon, Genesis owners will be able to play games like Teenage Mutant Ninja Turtles: The Hyperstone Heist from Konami, and Tecmo's awesome Tecmo Super Bowl. And our favorite licenses from the past are still

keeping up the good work with new sports like Team U.S.A. Basketball from EA, and new licenses, like Superman from Sunsoft. In all there are now over forty five official Sega licenses, and that means more great games for you!

And if all those licensed games aren't enough, Sega themselves has a flood of great titles coming at you

Great movie translations like Home Alone, Cool World, and Batman Returns, more Disney action with TaleSpin, The Little Mermaid, and World of Illusion starring Mickey Mouse and Donald Duck; and long

awaited original games like GreenDog, Sonic 2, and the 16 Meg Streets of Rage 2!

Sega brings you closer to sports with their Sports Talk series, and this winter Sports Talk meets the NFL, in NFL Sports Talk Football, Starring Joe

Montana!

With more than 300 games to choose from, it is easy to see why the Genesis has been number one for the last three years, and why it will stay number one in the future!

If I can't take it with me, I'm not going!

Sega hasn't forgotten about those who want to take their game action on the road. Support for the Game Gear has continued to grow over the last twelve months, and new advances now allow developers to make portable games larger than

before. Sonic 2 on the Game Gear will be a full 4 Meg, the same size as the first Sonic on Genesis! Other 4 Meg titles coming soon are Mickey Mouse 2 and the original Defenders of Oasis.

Now there is no need to leave your favorite games at home. Most of the great Sega titles available on Genesis, will be making their way to the little screen, including, Batman Returns, Ariel, The Little Mermaid,

CAN YOU TAKE THE TERROR?

SHE'S BACK!

FEEL THE SUSPENSE!

FEEL THE DANGER!

FEEL THE TERROR!

ALIEN 3[™] ON GENESIS[™] AND GAME GEAR[™]

The Xenomorph are fast, spit acid and are right behind YOU! The motion tracker is your only warning. No time to think, no time to catch your breath...RUN!

Can't see very far ahead in these air ducts. Hard to breathe. Face-buggers can be anywhere. Must find a Queen Alien. The closer you get, the more Aliens you find...better not have them find you first!

Just keep telling yourself, "THIS ISN'T REALLY HAPPENING... IT'S ONLY A GAME."

even the most intellectual minds. Yet, the player can still experience the full impact of battle! Watch as blades clash, cities crumble, allies perish, and

chaos abounds in a land ravaged by evil! Launch armies of swordsmen, arches, horses, and monks against the dark forces who lendishly plundered Warsong from its protectors. Each new scenario brings with it startling revelations, deadly surprises and clues that will help to unveil the dark, sinister sides of Barba!

Easy to Command, Hard to Master!

With simple, pull-down menus and icon driven commands, you can spend more time concentrating on the hazardous battlefields, and less on learning tedious step by step instructions. Foot and Sword Icons allows you to easily control troops and commanders. The easy-to-use, pull-down menus enable you to execute a vast array of usually complicated commands. Playing the game, though, is a different story altogether. In the course of your siege, you'll incur such pitfalls as commanders dying, shortages of funds needed to purchase troops, and other monstrous "surprises." All of which contribute to the difficulty of future scenarios. WARSONG™ is more than just a game, it's the adventure of a lifetime.

The clash of forces will leave you breathless!

has coverage that's nothing less than global. Famed play-by-play announcer Ron Barr is all over the court like a full-court press. Commentary. Highlights. Instant replay. Real-life stats. The medal ceremony. Plus EASN crews are stationed all over the map, beaming stunning location shots.

Prove to the rest of the world that some of the best things are still made in the USA. TEAM USA BASKETBALL is available for only a limited time for Sega Genesis and IBM.

Visit your local EA dealer or order by phone any time: (800) 245-4525.

Give the world a driving lesson it'll never forget. Each TEAM USA member's style of play is authentic, right down to individual signature moves.

SUPER STAR WARS

You start your quest as Luke, but you select from other heroes later.

"USE THE FORCE LUKE!"

It seems like only yesterday we all heard these infamous words from Ben Kenobi. That was fifteen years ago, however, and now Lucas is dazzling us once again with Super Star Wars for the Super NES. This game captures all of the excitement of the movie bearing the same

name. Super Star Wars is one of the best translations of the original movie for any system to date. Almost every scene, from the sands of Tatooine to the final fight down the trench of the Death Star is captured in pixel-perfect detail! The music is digitized straight from the movie and incorporated into the action very well. The game also makes use of the Super NES's

advanced capabilities, especially Mode 7 features highlighted in the Landspeeder and X-Wing scenes. So grab your lightsaber and join the rebellion!

LEVEL THREE: FIGHT TO THE TOP OF THE JAWA CANYON/CANYON.

CINEMA DISPLAYS THAT ARE SO INTENSE IT'S ALMOST LIKE YOU'RE WATCHING THE ACTUAL MOVIE!

COLLECT THESE IMPORTANT ITEMS AND POWER-UP THE REBELLION!

BONUS MULTIPLIER
Increases all point values. Can be built up to 8x normal points.

SMALL LIFE HEART
Increases remaining health by small amount.

LARGE LIFE HEART
Increases remaining health by large amount.

BLASTER POWER-UP
Enhances shooting strength. Can be increased five times.

EXTRA LIFE ICON
Awards an additional life. Remember these are rickety.

JET FUEL CANISTER
Enables flight in landspeeder scenes.

INVINCIBILITY SHIELD
Provides total protection for short period of time.

HEALTH SWORD
Increases available amount of health. Resets with each new level.

THERMAL DETONATOR
Eliminates all enemies on-screen. Must be used quickly!

TIME INCREASE ICON
Increases available time left to complete a round.

YOU CAN POWER UP EACH CHARACTER'S BLASTER FIVE TIMES. LUKE ALSO HAS ACCESS TO HIS TRUSTY LIGHTSABER.

The Bosses at the end of each level are incredibly huge and graphically outstanding! Almost every Boss is instantly recognizable because they are straight out of the original movie. Each Boss is increasingly more challenging and has its own pattern which must be mastered for success. Coupled with these incredible graphics are great sound effects. You will be amazed at the overall realism and intensity of the action!

Your journey to the Death Star will not be easy. You start out as Luke on his home planet, Tatooine, where you find C-3PO in his crashed escape pod. After defeating the Sarlac, you must race to the Jawa's Sandcrawler in your Landspeeder to rescue R2-D2. After completing this, you return home through the Dune Sea, home of the Sandpeople and Ben Kenobi. Ben tells you of your Jedi past and gives you your father's lightsaber. He asks you to assist him in finding passage to the Alderaan system, but in order to do this, you must find a ship and pilot at the Mos Eisley space port. Once inside Mos Eisley, you and Ben look for candidates in the Cantina, where Han and Chewie are found! After leaving the space port, you take to the stars, but a tractor beam pulls your ship into the crowded Death Star. This is where your final challenge awaits. The fate of the Rebellion lies in your hands!

Once inside the Sandcrawler you must rescue R2-D2 from the vile Jawas.

Inside the Cantina you will find someone to take you to Alderaan.

After deactivating the tractor beam, battle your way to the exhaust trench.

Evade tie fighters and use your proton torpedoes to destroy the Death Star.

YOU MAY HAVE WON THIS TIME, SKYWALKER, BUT THE EMPIRE CAN ALWAYS STRIKE BACK!

More than 15 years after its release, the mere mention of Star Wars still stirs the imagination and appeals to all of us.

Even now, stories and rumors surround the legendary motion picture and an industry-spanned by Star Wars merchandising continues to thrive.

The Star Wars phenomenon boasts statistics as imposing as the Death Star. The saga has been seen by more than 700 million people, sold over \$2.6 billion in consumer products, and grossed over \$100 million in video cassette sales.

A new best-selling book series by Hugo Award Winner Timothy Zahn has resurrected interest in the original film trilogy and fueled speculation that more Star Wars films may be en route.

According to officials at LucasFilm, creator George

Lucas is planning a trilogy prequel to the three

Star Wars motion pictures. The first of the three films will be in production within the next five years.

The epic film(s) will explain how the good powers of the Force and the sinister might of the Dark Side came into being. Imagine a young Obi-Wan Kenobi and Darth Vader before he turned to the Dark side of the Force.

Toy figurines depicting Star Wars characters are now worth as much as \$75 each.

New rides at Disneyland and Disneyworld also celebrate the Star Wars theme.

Other Star Wars memora-

The STAR WARS Phenomenon

bles include video games (including some old Parker Brothers titles that were used with the venerable Atari 2600), a role-playing game with several manuals, multi-taming, ceramic plates, chess sets, hologram watches, puzzles, trading cards, books and even a planetarium show.

Dark Horse Comics just launched its Classic Star Wars title in September. Marvel and Dark Horse have both previously published comic books based on Star Wars.

LucasArts officials attribute this renewed interest in Star Wars mainly to Zahn's book series. For several weeks, both "Heir to the Empire" and "Dark Force Rising" were at the top of the New York Times bestseller list. The books pick up the story where the film trilogy ends.

With a Super NES cart on the way (see the Fact File),

and anticipation of a new film in 97,

the force of the Star Wars legend will continue to be strong for a long, long time.

SUPER NES

**"BEEP!
BEEP!"**

ROAD RUNNER

This gerie mine shaft holds many traps laid by the "genius."

Yes, Mars is a level and the familiar alien cast is present!

Acme is making a new factory, and Wile E. Coyote is testing their equipment!

After the X-Men are captured, Spiderman lends a helping hand in getting them back. Arcade has placed explosives all over the city, and Spidey must diffuse them while freeing the X-Men. After removing the bombs, Spiderman finds out the task was a trap! All of the heroes are thrown into separate fantasy warps.

Spiderman's duty is not over. He must also pass through this sinister level.

You must help Wolverine find his way out of Arcade's terrible toyhouse.

Cyclops is confined to an underground mineshaft deep below the surface.

Level One: Spiderman must successfully diffuse all the bombs that have been scattered throughout the city. Do this and the X-Men will be rescued.

Storm now finds herself in the murky depths of a dangerous, unknown sea.

Don't let this huge spike ball ruin poor Gambit's day in the casino world.

DON'T FLIRT WITH Q*BERT!

Remember when Q*Bert was the hottest game in the arcades? He's the strange little character who lives in a geometric world avoiding nasties like Coily, Slick, Ugg and Wrong Way, among others. Now, Q*Bert is hopping to your Super NES in

Q*Bert 3! This time, Q*Bert bops across three-dimensional graphics to stereo sound effects. In addition to the usual line up of enemies, there are some new faces to watch out for, such as frogs and pipes that spit out dangerous bouncing balls! Add a pause mode and other features and you get a wild new adventure unlike anything you've seen before!

Q*bert 3

THE ONE & ONLY: The bouncin' man himself, Q*Bert! This video superstar needs no introduction or explanation!

BONUS: One of the items that will give you big points. Collect cherries and other fruits on your quest to be the best!

DISC: This is the item that can remove Q*Bert from danger and takes him to the top of the board!

PIPE: This utility shoots out balls that bounce down the board. Like most everything else, they are fatal to Q*Bert!

TAKE ME OUT TO THE BALL GAME!

The nation's favorite pastime is reproduced once again with new style in Namco's contribution to the video baseball battles.

Super Batter-Up combines the lively graphics and animation afforded by the Nintendo 16-Bitler with a fine attention to baseball detail. The game attempts to spice up the feel of conventional baseball carts by adding a variety of options and including actual players!

The options that have been programmed into Super Batter-Up range from control over background details such as line-ups and pitching changes to the selection of stadiums. This is a particularly important feature since each complex has a different construction and challenge.

Although standard video baseball interaction is present (highlighted by proven hitting and fielding perspectives), extra touches such as the singing of the national anthem increase the game's overall realism.

Meet The Faces Behind Most Medical Advances.

There are a lot of doctors and researchers out there who deserve credit for society's medical achievements. But the fact is, they'll have to share the credit. Because before any medical project can break new ground, it has to get off the ground. And that takes money. We urge you to contribute to the hospital of your choice. Your help could mean a solution to many of today's most pressing medical concerns. The first of which is, quite frankly, funding.

GENESIS

Search out the ancient temple to discover the source of evil.

Strike quickly and silently at the enemy using the night's veil of darkness.

Be on your guard as a drugged out rocker tries to bash your brains in.

NINJA GAIDEN

Combat rages on the rooftops of the city's tallest buildings and skyscrapers.

DESTINY AWAITS

You are Ryu Hyabusa, last descendant of an honorable ninja clan. Armed only with the Dragon Sword, an heirloom passed on through the generations, you must hunt down a terribly ruthless criminal. Known only as the Master of Darkness, it's up to Ryu to vanquish this Boss and his forces.

Utilizing your martial arts skills to defeat the enemy, you must restore your family honor with a blade. It is your fate to do so.

Ninja Gaiden brings all the intensity of the 8-Bit classic to the Genesis, with enhancements in every category. The music is exotic and fast paced, the graphics detailed and the action fierce throughout.

The cityscape at night is the perfect setting for a ninja nightmare.

Take on the enemy one-on-one, or fight your way through entire gangs.

Drug dealing in the casino is one of the many evils you will find on your quest.

THE SECRET OF MONKEY ISLAND

YO HO HO AND A BARREL OF MONKEYS

Shiver me timbers, liddle! Youngsters like you need to be careful if you wish to survive *Monkey Island*. Fates worse than keel hauling await those not up to the challenge. Voodoo curses, ghosts, and witch doctors are but a few of the many obstacles you'll encounter.

Landlubbers listen closely, and I will tell ye a tale of treasure. Long ago a vicious pirate named LeChuck found a secret entryway into an underworld. Filled with lava; it was. He met an awful fate, but he left behind more booty than you can imagine. Guarded by his ghost, no one has ever been able to steal his treasure. Will you be the first?

Deep beneath Monkey Island, the ghost pirate LeChuck's ship lies anchored in a river of lava.

Deep in a bed of lava lies LeChuck's hidden ship of pirate treasure!

LeChuck's ghost haunts the island, intending to protect his treasure forever!

Pirates love good ale and long tales; maybe you can supply them with both.

Search out clues. Almost everything can be used later in the game.

Argh matey, seek out every section in this vicinity to find helpful things.

Listen to your elders, and you will not go wrong. Try to use their good advice.

My dream: to be at the tournament. Now, I can really show my stuff!

The top half of the advertisement features a dramatic landscape. A large, glowing orange sun or moon hangs in a dark sky above a jagged, blue mountain range. In the center, a stone castle with multiple spires sits atop a rocky peak. A large, ornate sword with a silver blade and a gold and silver hilt is positioned horizontally across the middle of the scene, appearing to float or be held in place. The title "Soul Blazer" is written in a large, stylized, orange and yellow font with a black outline, positioned above the sword.

BECOME THE FANTASY

Embark on the adventure of a lifetime with Turbo Technologies' new adventure, **LOOM**. You are Bobbin Threadbare, a young member of an ancient sect known as the Guild of Weavers. Loom is different from the many other adventure games because you must not only play it, but complete it to experience its magic fully.

Use Bobbin's distaff to weave magical spells (known as drafts) which will help you on your quest to destroy Chaos.

The spells are cast by using a series of musical notes that are discovered along the way. The game is highly detailed and even allows you to weave spells backwards for an opposite effect! For example, the draft of opening cast backwards becomes the draft of closing!

Special note must be made of the beautifully detailed graphics and the brilliant CD-quality musical score. The spells, though numerous, are easy to recall when you get the hang of it!

Leave the friendly confines of our pearly little world and enter the universe of dark fantasy and incredible challenge contained within **LOOM**. Oh what a tangled web we weave...

IS THIS THE END OF MEGA MAN?

Dr. Wily just won't quit! After four attempts to destroy the plucky and resourceful Mega Man, the evil doctor may have finally created enemies who will do the job! Dr. Wily is trying so hard to do it right that he let fans of the popular game series create their own villains! Who better to design Mega Man's new opponents than the fans who love and adore him? What a devious plan!

This occurred during a contest in Japan, where Capcom accepted ideas for new Bosses to be included in their upcoming Mega Man 5 game. This scheme was also used in preparation of Mega Man 4, but our hero still survived! Although Mega Man 5 isn't quite finished, it will very likely leave a distinctive mark next to its predecessors!

So maybe, just maybe, Dr. Wily's fifth set of robot rejects will get the job done. Or will they?

Dinosaurs Blown Back to the Stone Age

Rumors of Steven Spielberg's upcoming prehistoric epic "Jurassic Park" are becoming as mythical as the dinosaurs in the film.

But in mid-September production suffered a major blow when Hurricane Iniki swept through the elaborate set situated in a remote location on the Hawaiian island of Kauai.

Projected to be next summer's blockbuster, Jurassic Park will likely be back on schedule in time to

hit its release as planned.

Still, insiders are buzzing about special effects techniques that will be used in the film. Speculation persists that computers, instead of models, will create most of the animation.

The film will take Terminator 2 inspired effects to new heights. Such an extensive use of computer graphics for animation is unprecedented, but experts predict it will revolutionize special effects.

MOVIES

Solo in the Big Apple

He was left behind again. But this time, Kevin McCallister (Macaulay Culkin) is in New York City during Christmas.

Bumbling bad guys Joe Pesci and Daniel Stern reprise their roles as the wacky antagonists of "Meek" in Home Alone 2: Lost in New York.

The overwhelming positive response from test-screening audiences indicate that Home Alone 2 has the potential to duplicate the astronomical success of the original, which was the third highest grossing film in movie history.

One question though: Why

The gang returns in time for Thanksgiving. Hey Mac, you want the leg or the wing? call it Home Alone 2 if he's on vacation?

Mork the Merry Toymaker?

Well, sort of. Robin Williams is reunited with director Barry Levinson for the first time since Good Morning Vietnam.

Williams plays a whimsical toy maker who must save his father's toy factory from the clutches of his demented uncle. Big fun.

Toys, starring Robin Williams, opens in December.

And Finally

Bruce Willis is considering a lucrative offer from 20th Century Fox to do Die Hard 3. Another run-in with terrorists? Maybe it should be called Bad Luck 3.

MAN OF STEEL TURNING TO RUST?

A special poly-bagged edition, costing \$2.50, includes Superman's obituary from the Daily Planet, a mock

Superman postage stamp, a mourning armband emblazoned with the traditional "S", and a poster portraying Superman's funeral with both his friends and foes paying their final respects to the fallen hero.

Even though DC Comics has been flooded with phone calls in support of keeping Superman alive, the only issues planned after #75 are those covering Superman's funeral.

SPORTS

Two Legit 2 Quit

Picture courtesy Upper Deck

From football practice he goes to his baseball game, such as one for his nearly super-athlete Deion "Prime Time" Sanders. And as the Atlanta Braves gear up for the World Series while the Atlanta Falcons shoot for the

NFL playoffs, Sanders is a critical element in both teams' mixes.

In fact, Sanders is so important to his two teams, that both offered him multi-year, multi-million dollar contracts to stick with their sport and drop the other.

No chance, says Deion, who was among the National League leaders in batting average for much of this season.

Instead of the NFL season, Sanders returned a kickoff 99 yards against the Washington Redskins.

In either sport, Sanders is truly a "Prime Time" player.

GADGETS

"Hello. This is my answering machine...I can't get the phone right now, I haven't fixed my hair yet."

That may be a likely greeting when products like the FuturePhone, a television picture-phone, become widely available.

Don't worry about keeping a comb near your phone any-time soon though. Future-Phone is just a concept model that's not expected to be released for some time.

CONTEST

The Battle of the Magazine Editors

All of the editors of the major game magazines in the U.S. and Japan recently gathered in Sapporo Japan to go head-to-head in the ultimate game contest!

Sponsored by Micronet of Japan and their U.S. subsidiary - Bignet, the editors were able to try out firsthand the company's new Sega CD fighting game - Black Hole Assault.

The competition was formidable. From Japan there were editors of famous magazines such as Famicom Tsushin, Beep Megadrive,

Mega Drive Fan, Game Boy, PC Engine Fan, Merukatsu PC Engine, Monthly PC Engine, Hippon Super and Marukatsu Mega Drive.

Representing the U.S. were the editors of Electronic Gaming Monthly (Ed Semrad), GamePro (Wes Niho) and Video Games and Computer Entertainment (Andy Eddy).

Before the game contest, Mr. Akhiko Murekami, president of Micronet Inc., talked about the development of Black Hole Assault, followed by a presentation by Mr. Yeno of Sega of Japan about the future of Sega's CD-ROM system and the leaps they're taking in software.

Then the competition began. Since the U.S. editors were outnumbered 18 to 3, they took a pass on the first round of competition. In the second round it was their turn to play. Each was matched up with one of the

winners of the first match.

The competition continued and the eventual winner was the editor of the PC Engine magazine. Although the U.S. players put up a good fight, they were ultimately bested by the guys with home held advantage.

For a detailed look at Black Hole Assault, check out the Sega CD Fact-File starting on page 218, and for a preview of all of Bignet's Sega titles, page through the exclusive 68 page Sega Force supplement in this issue.

EGM's Ed Semrad takes on one of the Japanese game mag editors.

Mr. Murekami introduces Micronet's new Sega CD - Black Hole Assault.

WHAT'S NOT

INNERVIEW

Laser Discs

On the Brink of a Breakthrough

After an inauspicious debut, Laser Discs packed with features superior in technology and quality to video cassettes, are beginning to gain wider appeal among movie buffs.

LD's are quite similar to Compact Disc's, except they include video as well as sound.

Consequently, LD's boast the same inherent advantages. The recording never fades or distorts, the sound (and picture) is unsurpassed in clarity, and the digital format allows for greater flexibility.

Several scenes that were cut from the original version of *The Lawnmower Man*. Many laser discs contain additional footage and descriptions from movies.

The inside of the alien mothership is revealed in *Close Encounters of the Third Kind*. In found in the film's original release, many laser discs offer special "letterbox" displays

That flexibility has enabled film distributors to include features on LD recordings that are not usually

found on video cassettes.

More and more movies released on LD have such bonuses as behind the scenes look at actors, directors, or the making of the film; a simulated theater screen known as "letterbox" format; or extra scenes not found in the original big screen version of the film.

Film distributors have realized that those people who become fans of theatrical releases will also pay to see enhanced versions

of their favorite films at home.

Aliens director James Cameron, for example, reinserted nearly 20

in addition to boasting additional footage not that simulate the look and feel of a theater.

minutes of footage on a wide screen edition of the Sci-Fi thriller. The additional scenes expand the storyline and make *Aliens* worth a re-watch for everyone - especially die hard fans!

In a Special Widescreen Collector's Edition of *Aliens*, an opening sequence that last nearly six minutes introduces Newt's family while showing how the *Alien* infestation begins on their world.

Director Steven Spielberg was adamant that the letterbox format (which has the same 1.85:1 ratio as theater screens) be retained for the LD release of *Close Encounters of the Third Kind*.

In an interview at the end of the LD version of the film, Spielberg reveals many interesting insights into the making of *Close Encounters*.

An audio feature on the *Wizard of Oz* LD enables the viewer to select between the movie's soundtrack and a fascinating running commentary on the history and making of the film classic. Did you know that Buddy Ebsen, who played Jed Clampett on the *Beverly Hillbillies*, was originally cast as the Tin Man but dropped out because of an allergy to the silver face paint?

Star Trek 6 only has approximately three minutes of new footage, but that time dramatically alters the film's overall storyline.

A break-dancing Scarecrow? Not really, but in the collector's edition LD of *The Wizard of Oz*, this dance sequence and other scenes that were originally omitted have been restored.

The recently released *Lawnmower Man* LD also includes scenes extracted from the theater version of the high-tech horror film.

Many owners of LD players are looking forward to a special version of the 1991 blockbuster *Terminator 2*. Although Cameron, who was responsible for bringing *Aliens* back to life on LD, has not commented on a director's cut, several scenes from the movie were filmed. Among the footage that could find its way onto LD are the original ending (showing an old Sarah Connor with her Senator son John), the shut-down of Sky-Net, or Sarah's dreams of Kyle Reese.

Falling prices of LD players have recently made it possible for many more people to enjoy the added quality and depth that LD has to offer. You can now find a decent LD player for about \$500.

LD's appear to be on the verge of gaining mass acceptance. When that happens, expect to see LD entertainment expand beyond new footage.
